

Prostate Examination Simulator

Product No.

M53B

Production supervision:

Dr. Osamu Yoshida, Professor Kyoto University
Faculty of Medicine, Department of Urology

Dr. Takashi Katayama, Professor Toyama Medical and
Pharmaceutical University Department of Urology

The Prostate examination simulator provides realistic training in prostate palpation. Soft life-like anus and rectum material allows efficient training in examination skills. Ten types of prostates are placed in the simulator and the trainer can smoothly interchange them using a simple rotating system. Three patient positions are possible. Compact and space-saving design.

Built-in prostates can be quickly changed using a simple rotating switch: useful for teaching a group of students and testing their achievement.

Ten prostate cases for training: two types of normal prostates, two types of prostate-gland enlargements, one prostatitis and five types of carcinomas.

Soft, life-like material of anus, rectal and lumbar torso provides realistic training in examination procedures, improving skills to diagnose prostate diseases.

The improved lumbar torso can be placed in three patient positions: supine, prone and lateral position.

Set includes:

- 1 male lumbar torso
- 1 rotating unit
 - 10 prostate cases: 2 normal, 2 enlargements, 5 carcinomas and 1 prostatitis
- 1 jar of Vaseline
- 1 pair of gloves
- 1 carrying case

manikin size: 40 x 32 x 24H cm, 5.3 kg
packing size: 41 x 40 x 33H cm, 7 kg

Replacement parts

11272-040 Replacement anus pad
